Title : How Else Do You Think They Make Glue?

Lyrics :

100 billion dead a year, 8.3 billion dead a month, what am I talking about
I'm talking about the mindless murder of creatures who we take advantage of.
Take advantage of with no thought, or any conscience even present.
Creatures who feel, creatures who love, creatures who walk and who talk

Animals just like you and I. after all were animals too never forget that
The only difference is that we don't kill in defense, we kill for pleasure
We kill for our own self centeredness, for our own supposed benefit
How can one singular life can compare to the lives of 100 billion others

Children are taught that it is completely humane to kill for no reason
Look to your schools when a child kills another and has no recognition
The place of education tells our children that it's ok to vivisect and murder
One of the most despicable acts and it's a state endorsed education program

The CSIRO a government body use animals to test experimental drugs for humyns.
If they are so concerned then why don't they use humyns for their tests?
Oh but that's inhumane you say, we can't test on humans that's insane.
But you're quite happy to see them kill primates to help you quit smoking

V-v-v-v-v-v-v vivisection, d-d-d-d-d-d-d dissection
So concerned with the humyn condition, it's a clear cut moral decision.
