**Title :** Industry Standards

**Lyrics :**

You're trying to tell me this is industry standard?  
insanity standard, comes in a wrapper, its hot off the press  
destruction, elimination, force fed on an entity of genetic engineering  
"we just tinkered with it", tinkered with what, where?

transportation, if you wish to use such common term  
make it palatable, edible, bite sized chunks (yummy)  
the media. "this is a current affair", ray are you joking?  
coverage, ignorance, the buck is passed while they keep bleeding

legislation, its legal, under what flag, flown, not mine  
ethics the issue, served cold, or hot, or raw?  
morality, the decision made not by subjects  
but by fat cats, not house trained, ruthless, feral

exports?, for your budget surplus, your pockets lined  
never think of the cages. wank too much, youll go blind  
weather, controlled atmosphere, theres no fucking problem here  
royal commisson, submission, cant see that ship through the fog of your lies!

australian public, national pride, tradition of the "feast"  
G.E lamb and beef, get it in your gob (fuck it) feed the beast  
un-australian, guess i better surrender my cizerzenship  
send me back, send me back, if possible please by ship

abbottair worker, no abortion for his beloved wife  
"come on darling, murdering babies?, thats just not right"  
conscience, concious, decision making, made by the master  
see the irony? ironic isnt it, legal, illegal, "live by the law"!
