The Vigilante Punks new album, "Demons From Mars" is set to be released by June 30th, 2008! The album is 28+ minutes of horror, sci-fi, and politics exploding from your stereo like a bat out of hell!

The Vigilante Punks are firing back at all the corporate punk bands who try to monopolize punk rock. It's time to take punk rock back to it's roots, back to when it was about the music and not the money!

You can't go wrong with song themes like killing zombies, "BFG", waking the dead, "Wake the Dead", and taking a stand against corrupt government, "Smash the State", "I'm the President".

If you like hardcore punk rock, horror punk, skate punk, or just punk rock in general then make sure to pick up this album, play it loud, and wake the dead (or your neighbors)!

"Demons From Mars" will be available at cdbaby.com
